INTRODUCTION

On this page you will find several **AGENTS OF THE IMPERIUM** Detachments you can select from, as described in the Core Rules (see the Select Detachment Rules step). If you are playing a Crusade battle, see the equivalent step in the Mustering a Crusade Army section of the main Crusade rules. Each Detachment is a themed fighting force that focuses on one particular combat style employed by the Genestealer Cults - the rules they include are as follows:

1 DETACHMENT RULE

The Detachment rule listed here will apply to either your whole army or to particular units within it.

2 ENHANCEMENTS

When mustering your army, your chosen Detachment enables you to upgrade **CHARACTERS** using the Enhancements listed here, as described in the Core Rules (see the Select Units step). If you are playing a Crusade battle, you can instead use the Renowned Heroes Requisition to give your **CHARACTERS** Enhancements, as described in the main Crusade rules.

3 STRATAGEMS

Your chosen Detachment gives you access to the Stratagems listed here in addition to the Core Stratagems listed in the Core Rules. During the battle, you can spend Command points (CP) to use these Stratagems.

ARMY RULES

ASSIGNED AGENTS

Throughout the Imperium there exist numerous martial organisations and shadowy institutions. Bodies of armed warriors or solitary agents from these groups possess specialist skills, unusual equipment and vested interests that lead them to be attached to larger Imperial armies. Some are requisitioned by the army's commander for their particular abilities, others are assigned by their hidden masters to achieve singular agendas. The most powerful have the authority and reputation to enforce their presence on the field of battle.

If your Army Faction is **AGENTS OF THE IMPERIUM**, then in the Select Detachment Rules step, you can select one of the available Detachments from this book as normal.

If your Army Faction is not **AGENTS OF THE IMPERIUM**, but every model in your army has the **IMPERIUM** keyword, you can include **AGENTS OF THE IMPERIUM** units in your army even if they do not have the Faction keyword you selected in the Select Army Faction step. In this case, the maximum number of **AGENTS OF THE IMPERIUM** units you can include in your army depends on the battle size, as shown below.

BATTLE SIZE	RETINUE UNITS	CHARACTER UNITS	REQUISITIONED UNITS
Incursion	1	1	1
Strike Force	2	2	1
Onslaught	3	3	2

Note that you can include **AGENTS OF THE IMPERIUM DEDICATED TRANSPORT** units in such an army as normal, but each unit must start the battle with one or more units embarked within it, or it cannot be deployed for that battle and will count as having been destroyed during the first battle round.

KILL TEAM

Each time an attack targets this unit, if it contains models with different Toughness characteristics, until the attacking unit has finished making its attacks, use the Toughness characteristic of the majority of the models in that unit when determining what roll is required for that attack to successfully wound. If two or more Toughness characteristics are tied for majority, use the highest value.

For the purposes of determining which models in this unit can embark within a **TRANSPORT**, Kill Team Terminator models, Kill Team Outrider models, Kill Team Biker models and models equipped with a jump pack each take up the space of 2 models, but can otherwise embark within any **TRANSPORT** their unit can embark within, even though similar models in other units have the **TERMINATOR**, **MOUNTED** or ~~**JUMP PACK**~~ keywords.

For the purposes of interacting with **terrain features**, all models in units with this ability are considered **INFANTRY** models, even though similar models in other units may have the **MOUNTED** or **JUMP PACK** keywords.

Designer's Note: *While the abstractions in the above rule cause some models to behave differently to similar models in other units, they are designed to minimise complicated movement,* **TRANSPORT** *and* ***Benefit of Cover*** *rules.*

ORDO XENOS ALIEN HUNTERS 2DP

DETACHMENT RULE

DEATHWATCH MISSION TACTICS

Thousands of years of collated strategic data and hard-won combat experience have provided the Deathwatch with the ultimate battlefield tactics to combat almost any foe.

At the start of your Command phase, you can select one of the Mission Tactics listed below. Until the start of your next Command phase, that Mission Tactic is active and its effects apply to all **DEATHWATCH** units from your army. Each Mission Tactic can only be selected once per battle.

Furor Tactics

The warriors of the Deathwatch are often sorely outnumbered by swarming foes, yet by striking for maximum indiscriminate carnage they soon even the odds.

While this Mission Tactic is active, weapons equipped by **DEATHWATCH** units from your army have the **[SUSTAINED HITS 1]** ability.

Malleus Tactics

Even the largest behemoth has a weak point, and the Deathwatch find them all.

While this Mission Tactic is active, weapons equipped by **DEATHWATCH** units from your army have the **[LETHAL HITS]** ability.

Purgatus Tactics

Adopting Purgatus tactics, the Deathwatch focus their ire upon the commanders of the enemy host.

While this Mission Tactic is active, each time a **DEATHWATCH** model from your army makes an attack, on a Critical Wound, that attack has the [PRECISION] ability.

IMPERIALIS FLEET

2DP

DETACHMENT RULE

AT ALL COSTS

While the nature of the missions undertaken by Imperial agents is as varied as they are, the vital importance of these tasks rarely changes. The enemies they face are the most unholy. The prizes they seek are as priceless as they are nightmarishly dangerous. At the start of your Command phase, you can select one of the following to apply:

Eliminate At All Costs

Select one enemy unit on the battlefield. Until the start of your next Command phase, each time an AGENTS OF THE IMPERIUM model from your army makes an attack that targets that enemy unit, add 1 to the **Hit roll**.

Acquire At All Costs

Select one objective marker on the battlefield. Until the start of your next Command phase, while an AGENTS OF THE IMPERIUM unit from your army is within range of that objective marker, improve the Leadership and Objective Control characteristics of models in that unit by 1 and models in that unit have a 5+ invulnerable save.

VEILED BLADE ELIMINATION FORCE

1DP

The lethally efficient agents of the Officio Assassinorum ordinarily operate alone when stalking their prey. However, when assigned a particularly well-protected or formidable target, assassins from various temples may be brought together alongside other assets drawn from the military, Ecclesiarchal or judicial wings of the Imperium. These bespoke formations possess enough firepower to break through the target's defences and ensure the killing blow is landed.

DETACHMENT RULE

EXTREMIS SANCTION

When pursuing an extremis-level target, the agents of the Officio Assassinorum are expected to push their altered minds and bodies beyond the limits of endurance. Additional equipment, augmentation and ammunition may be provided to complete the task.

OFFICIO ASSASSINORUM units from your army can use the Overkill, Soulless Horror and Shieldbreaker abilities twice per battle, instead of once per battle (but cannot use such an ability more than once in the same battle round).

When mustering your army, each OFFICIO ASSASSINORUM unit from your army has the relevant Extremis ability shown on the right, and you must increase the points cost of each of those units by the amount shown. If this causes your army to exceed the points limit for the battle you are playing, you cannot include that unit in your army.

EXTREMIS ABILITIES

The agents of the Callidus Temple are known to utilise vat-grown doubles to confound their foes.

CALLIDUS ASSASSIN models only. Twice per battle, in your Movement phase, you can select one other friendly INFANTRY model that is on the battlefield and not within **Engagement Range** of one or more enemy units. The selected model is destroyed (ignoring any rules that are triggered when a model is destroyed) and this model is removed from the battlefield and set up again as close as possible to where that destroyed model was and not within Engagement Range of one or more enemy units. This ability cannot be used more than once in the same battle round.

ESOTERIC EXPLOSIVES ..... 10 PTS

This Culexus operative has been outfitted with various grenades tailored to destroy their assigned targets.

CULEXUS ASSASSIN models only. Each time this model is targeted with the Explosives Stratagem, 1 **mortal wound** is inflicted for each D6 roll of 3+ instead of for each 4+.

INTRANEURAL BIOTECH ..... 15 PTS

This Eversor agent's neurons have been surgically spliced to enhance awareness and speed of thought.

EVERSOR ASSASSIN model only. You can target this unit with the **Heroic Intervention stratagem**, regardless of any other uses of that **stratagem** this phase. If you do:

- That use is -1 CP.
- That use does not prevent any uses of that **stratagem** on other units this phase.

ERRATA Show

MICROMELTA ROUNDS ..... 20 PTS

These projectiles are tipped with miniaturised melta charges that detonate on impact.

VINDICARE ASSASSIN models only. This model's exitus rifle has the [ANTI-MONSTER 4+] and [ANTI-VEHICLE 4+] abilities.

STRATAGEMS

PRIME TARGET — 1CP

VEILED BLADE ELIMINATION FORCE – BATTLE TACTIC STRATAGEM

A primary target has been revealed. All efforts must be made to ensure the kill.

WHEN: Your Shooting phase or the Fight phase.

TARGET: One AGENTS OF THE IMPERIUM unit from your army that has not been selected to shoot or fight this phase.

EFFECT: Until the end of the phase, each time a model in your unit makes an attack that targets a **CHARACTER** unit, re-roll a **Wound roll** of 1. If that attack is made by an OFFICIO ASSASSINORUM model and it targets the enemy **WARLORD**, you can re-roll the Wound roll instead.

HYPERSTIMMS — 2CP

VEILED BLADE ELIMINATION FORCE – BATTLE TACTIC STRATAGEM

Unenhanced mortal bodies are routinely – and unknowingly – dosed with experimental stimulant cocktails that serve to reinforce their resilience, at least in the short term.

WHEN: Your opponent's Shooting phase or the Fight phase, just after an enemy unit has selected its targets.

TARGET: One AGENTS OF THE IMPERIUM CHARACTER unit from your army that was selected as the target of one or more of the attacking unit's attacks.

EFFECT: Until the end of the phase, add 1 to the Toughness characteristic of models in your unit. In addition, if it is an EVERSOR ASSASSIN unit, until the end of the phase, it has the **Feel No Pain 4+** ability.

WILL-SAPPING SALVO — 1CP

VEILED BLADE ELIMINATION FORCE – STRATEGIC PLOY STRATAGEM

Aiming concentrated volleys of fire toward an exceptionally resilient foe, these agents erode the will of their target, increasing their vulnerability to the concentrated psychic onslaughts of the Culexus Assassin's animus speculum.

WHEN: Your Shooting phase.

TARGET: One AGENTS OF THE IMPERIUM INFANTRY unit from your army that has not been selected to shoot this phase.

EFFECT: Until the end of the phase, ranged weapons equipped by models in your unit have the [SUSTAINED HITS 1] ability. In addition, if it is a CULEXUS ASSASSIN unit, until the end of the phase, change the Damage characteristic of ranged weapons equipped by models in your unit to 3.

ORBITAL OVERSIGHT

1CP

VEILED BLADE ELIMINATION FORCE – STRATEGIC PLOY STRATAGEM

Aided by orbiting assets, when the assault begins, voidships flood communication networks with jamming frequencies, fire screening bombardments and otherwise mask the agents' approach.

WHEN: Your opponent's Shooting phase, just after an enemy unit has selected its targets.

TARGET: One AGENTS OF THE IMPERIUM INFANTRY unit from your army that was selected as the target of one or more of the attacking unit's attacks.

EFFECT: Until the end of the phase, your unit can only be selected as the target of a ranged attack if the attacking model is within 18", or, if your unit has the **Lone Operative** ability, if the attacking model is within 6".

BLIND GRENADES

1CP

VEILED BLADE ELIMINATION FORCE – STRATEGIC PLOY STRATAGEM

These grenades release thick black smoke and broad-spectrum electromagnetic chaff that disrupt vision and foul augury equipment upon detonating.

WHEN: Your opponent's Charge phase, just after an enemy unit has declared a charge.

TARGET: One AGENTS OF THE IMPERIUM GRENADES or VINDICARE ASSASSIN unit from your army that was selected as one of the targets of that charge and is not within **Engagement Range** of one or more enemy units.

EFFECT: Until the end of the phase, subtract 1 from **Charge rolls** made for that enemy unit, or, if your unit is a VINDICARE ASSASSIN, subtract 2 from Charge rolls made for that enemy unit instead.

ENSNARING TRAP

1CP

VEILED BLADE ELIMINATION FORCE – STRATEGIC PLOY STRATAGEM

The eyes of the Officio Assassinorum are everywhere. As the foe turns to flee, the noose tightens, agents already forewarned of enemy movements and moving swiftly to cut off all avenues of retreat.

WHEN: End of your opponent's Charge phase.

TARGET: One AGENTS OF THE IMPERIUM INFANTRY unit from your army that is within 6" of one or more enemy units and would be eligible to declare a charge against one or more of those enemy units.

EFFECT: Your unit can declare a charge. When doing so, you must select one or more of those enemy units as the targets of that charge. In addition, if it is a CALLIDUS ASSASSIN unit and it makes a **Charge move** as a result of this Stratagem, until the end of the turn, each time a model in your unit makes a melee attack, add 1 to the **Wound roll**

CRUSADE RULES

In this section you'll find additional rules for playing Crusade battles that are bespoke to AGENTS OF THE IMPERIUM units.

This section contains the following additional rules:

SHADOW OPERATIONS

Your **AGENTS OF THE IMPERIUM** Crusade force will be performing clandestine Shadow Operations within a sub-sector that is on the verge of collapse. You will investigate the plots that are taking place using a combination of military influence and intrigue to thwart the myriad enemies of the Imperium, and attempt to bring the sub-sector back under Imperial control.

AGENDAS

AGENTS OF THE IMPERIUM armies can attempt to achieve unique Agendas in addition to those found in other publications. These represent the factions goals and their particular methods of waging war.

REQUISITIONS

AGENTS OF THE IMPERIUM armies have access to a number of bespoke Requisitions in addition to those found in other publications.

BATTLE TRAITS

As they gain experience and prowess, **AGENTS OF THE IMPERIUM** units in your Crusade force can be given one of the Battle Traits in this section instead of one presented elsewhere.

CRUSADE RELICS

In addition to the Crusade Relics presented in other publications, **AGENTS OF THE IMPERIUM CHARACTER** models can claim one of the Crusade Relics found here.

MYRIAD MISSIONS AND PERILOUS PATHS

A unique set of narrative hooks has been included, to offer inspiration for what calamity has befallen your chosen sub-sector.

CRUSADE BADGES

Here you will find three Crusade Badges representing goals you can set yourself when campaigning with your Crusade force. Once one is achieved, you could set yourself a new goal, or take the opportunity to start a new Crusade force.

SHADOW OPERATIONS

If there are any **AGENTS OF THE IMPERIUM CHARACTERS** in your Crusade force, you can undergo a Shadow Operation to attempt to uncover and resolve clandestine Threats against the Imperium in a sub-sector, and attempt to restore Imperial control, thwarting those who plot against it.

Start by deciding a name for your sub-sector and generating the level of the Threats that are present within that sub-sector. Each sub-sector has three Threats and you can either choose the Threat Level of each or roll one D6 for each and consult the table below.

Each Threat Level has an associated Threat Score, Covert Level and Time Remaining value. The lowest Threat Level is Minoris, being easier to uncover and requiring less time to investigate, while Extremis is the hardest to decrypt, thus requiring more time to expose.

Once you have determined your three Threat Levels, note which of these you will be investigating on your Threat Tracker - you will use this to keep a record of the status of your current investigations. This tracker will also be used to keep note of the control status of your sub-sector, as well as your current Investigation points, Influence points and Intrigue points totals.
At the start of any Shadow Operation, the Sub-sector Control is set to 0 and you start with 0 Investigation points, Influence points and Intrigue points - you will have to earn these by playing Crusade battles with your **AGENTS OF THE IMPERIUM** Crusade force.

D6	THREAT LEVEL	THREAT SCORE	COVERT LEVEL	TIME REMAINING
	 Minoris	1	4+	3
	 Majoris	2	5+	5
	 Extremis	3	6+	7

INVESTIGATION POINTS

Each time you play a Crusade battle, in the Update Order of Battle step, if your Crusade army included one or more **AGENTS OF THE IMPERIUM CHARACTER** units, you gain 1 Investigation point which you must allocate to any of your Threats that are not yet Thwarted or Fulfilled (if possible). Each time you do, add a mark to the Investigation Points tally of your chosen Threat.

After allocating the Investigation point to your chosen Threat, you can try to uncover one Threat. To do so, select a Threat, roll one D6, and add 1 to the result for each Investigation point you have allocated to that Threat's Investigation Points tally. If the total is less than that Threat's Covert Level, nothing happens and your investigation continues. If the total is greater than or equal to that Threat's Covert Level, the Threat has been uncovered: roll on the relevant Threat table (see bellow), to discover what adversary has been revealed, and what is required to Thwart it.

Each Threat has an Intrigue goal and an Influence goal:

		INFLUENCE GOAL	INTRIGUE GOAL
	**Arch-nemesis**	**7+**	**7+**
	**Diabolical Ritual**	**6+**	**8+**
	**Cult Uprising**	**8+**	**6+**

		INFLUENCE GOAL	INTRIGUE GOAL
	**Ancient Artefact**	**6+**	**6+**
	**Agent Provocateur**	**7+**	**5+**
	**Saboteur Matrix**	**5+**	**7+**

		INFLUENCE GOAL	INTRIGUE GOAL
	**Compromised Agent**	**4+**	**6+**
	**Enemy Sympathiser**	**5+**	**5+**
	**Spy Network**	**6+**	**4+**

INFLUENCE

This represents the military resources that your agents need to gather, requisition and hire in order to crush the plot through sheer force.

INTRIGUE

This represents the degree of clandestine missions and counter-plans your agents must prosecute in order to foil the Threat through subtlety and misdirection.

By completing Agendas, you can gain Influence points and Intrigue points. These must be allocated in the Update Order of Battle step to an uncovered Threat of your choice (if possible). Each time you do, add a mark to the appropriate Influence points tally or Intrigue points tally of one of your uncovered Threats.

After you have allocated any Intrigue points and Influence points, you can attempt to Thwart one uncovered Threat. To do so, first test if you Thwart it via Intrigues by rolling one D6, adding 1 to the result for each Intrigue point allocated to that Threat. If the result is equal to or exceeds that Threat's Intrigue goal, the Threat has been Thwarted. Otherwise, you then test to see if you Thwart the plot via Influence by rolling one D6 and adding 1 to the result for each Influence point allocated to that Threat. If the result is greater than or equal to that plots Influence goal, the Threat has been Thwarted. If both of these rolls' totals are less than their respective Influence goal or Intrigue goal, nothing further happens and the Threat remains active.

Each time a Threat is Thwarted, you gain a number of Sub-sector Control points equal to that Threat's Threat Score, updating your Sub-sector Control tracker accordingly.

After allocating any Investigation points, Influence points and/or Intrigue points, and uncovering and/or Thwarting Threats (if any), add one tally to the Time Remaining tally of all currently active Threats and determine a Plot Twist by rolling one D6 and consulting the Plot Twist table below.

PLOT TWIST	D6
Plans Within Plans: Randomly select one of your active Threats. Increase its Threat Score by 1 (this can go above 3).	
Escalating Threat: Randomly select one of your active Threats. Add 1 mark to its Time Remaining tally.	
Counter-agents: Add 1 to the Intrigue goal of all uncovered Threats.	
Fierce Resistance: Add 1 to the Influence goal of all uncovered Threats.	
Delaying Action: Select one active Threat and remove 1 mark from its Time Remaining tally.	
A Promising Lead: Select one active uncovered Threat and add 1 mark to its Investigation point tally.	

When a Threat's Time Remaining tally is completed, if that Threat has not been Thwarted then that Threat is instead Fulfilled - you lose a number of Sub-sector Control points equal to that Threat's Threat Score, updating your Sub-sector Control tracker accordingly.

CEASE SHADOW OPERATIONS

When all of your Threats have been Thwarted or Fulfilled, your current Shadow Operation ends. The outcome of your agents' interventions is now assessed by looking at the Sub-sector Control tracker below and applying the relevant consequence.

After applying the result, you can then start another Shadow Operation if you wish, following the same steps as previously, resetting all tallys and Sub-sector Control to 0.

Download blank Threat Tracker:

-9 -8 -7	**TOTAL COLLAPSE** *Your efforts have been singularly inadequate and this region is lost to the Emperor's realm. You will be fortunate to escape the consequences of this disaster.* Each **AGENTS OF THE IMPERIUM** unit from your Crusade force either gains a Battle Scar or suffers a Devastating Blow.
-6 -5 -4 -3 -2	**SHAMEFUL LOSSES** *Outright catastrophe has been averted but the cost in lives and resources may yet plunge neighbouring systems into disaster.* One **AGENTS OF THE IMPERIUM CHARACTER** unit from your Crusade force gains a Battle Scar or suffers a Devastating Blow (this must be either the Disgraced or Mark of Shame Battle Scar).
-1 0 1	**ONGOING UNREST** *The obvious threats may have been purged but you cannot escape the sense that corruption still lingers.* Gain 1 Requisition point.
2 3 4 5 6	**PURGATION COMPLETE** *You have cleansed this region of heresy and done your duty to the Golden Throne. Yet the waris never done. New threats now call for your urgent attention.* Gain D3RP and one **AGENTS OF THE IMPERIUM CHARACTER** unit from your Crusade force gains 1 Battle Honour from the Vermilion-level Assets.
7 8 9	**MASTERFUL EXECUTION** *Not only have your efforts annihilated the immediate threat, but you have also spread terror of Imperial vengeance far and wide. The rewards for such success are considerable.* Gain D6RP and up to two different **AGENTS OF THE IMPERIUM CHARACTER** units from your Crusade force gain 1 Battle Honour from the Vermilion-level Assets.

VERMILION-LEVEL ASSETS

Each of the following Battle Honours is unique - you can only have one instance of each in your Crusade force. When gaining one of the Vermilion-level Assets Battle Honours, if that **CHARACTER** unit already has the maximum number of Battle Honours, you must replace one of their existing Battle Honours.

HIGHLY PLACED ALLY

Be they the Fabricator General of a forge world or a senior Munitorum adept, this contact channels valuable additional assets towards your forces.

If the bearer is your **WARLORD**, start the battle with 1CP. If the bearer is on the battlefield at the end of the battle and you won that battle, roll one D6: on a 4+, you gain 1RP.

SECRET FORCES

It has taken time and effort to seed these hidden cells of militant agents, but their support is ample reward.

If the bearer is included in a Crusade army whose Army Faction is not **AGENTS OF THE IMPERIUM**, the maximum number of **REQUISITIONED**, **RETINUE** and **AGENTS OF THE IMPERIUM CHARACTER** units that can be included in that army is increased by 1. Each time you start a Shadow Operation, you start with 1 Influence point.

TRAINED BY A LEGEND

A favour owed or leveraged persuades a legendary Imperial killer to impart their teachings to this willing student.

The bearer's unit has the **Lone Operative**, **Infiltrators** and **Stealth** abilities. Each time you start a Shadow Operation, you start with 1 Intrigue point.

MASTER OF SPIES

It wasn't easy to recruit or turn this shadowy figure, but now their intricate covert network is yours to make use of in the Emperors name.

Each time you start a Shadow Operation, you start with 1 Investigation point. Each time you roll on the Plot Twist table, you can re-roll the result.

BOUND ENTITY

Be it a daemon trapped in a warding circle or artefact, or some trammelled and tormented xenos being, this entity provides powerful - if forbidden - aid.

RADICAL model only. The bearer's unit has the **Deep Strike** ability. Once per Shadow Operation, when you attempt to Thwart a 'threat through Intrigue, you can re-roll that test. If the bearer loses the **RADICAL** keyword or gains the **PURITAN** keyword by any means, it immediately loses this Battle Honour.

UPHOLDER OF THE CREED

A highly publicised blessing delivered by a powerful Imperial priest lends the weight of holy writ to this agents every proclamation and deed.

PURITAN model only. Improve the bearers Leadership and Wounds characteristics by 1. Once per Shadow Operation, when you attempt to Thwart a Threat through Influence, you can re-roll that test. If the bearer loses the **PURITAN** keyword or gains the **RADICAL** keyword by any means, it immediately loses this Battle Honour.

VOID TRADER

When fighting hidden wars, a web of favourable contracts, ratified writs and bribed or blackmailed void merchants is an incredibly valuable asset.

If the bearer is on the battlefield at the end of the battle, increase your Crusade forces Supply Limit by 50 points. At the end of any battle, you can select one model from your Crusade force that has one Crusade Relic or one weapon that has a Weapon Modification. If you do, you can remove that Battle Honour from that model - you can either replace that Battle Honour with a different Crusade Relic that model can have or you can gain 1RP.

AGENDAS

If your Crusade army includes any **AGENTS OF THE IMPERIUM** units, you can select Agendas from those presented here.

AGGRESSIVE NEGOTIATION

When in search of exotic archeotech or an enhanced and fearsome reputation, diplomacy and threats get an agent of the Throne only so far. Sooner or later, force is almost always required.

After both players have deployed their armies, your opponent must select one objective marker that is not in their deployment zone to be the Acquisition Target. At the end of your turn, if you control the Acquisition Target objective marker, you can select one **AGENTS OF THE IMPERIUM** unit from your Crusade army that is within range of it; that unit gains 1XP. At the end of the battle, if you control the Acquisition Target objective marker, you gain D3 Influence points and you can select one **AGENTS OF THE IMPERIUM CHARACTER** model from your Crusade army (excluding **EPIC HEROES**). That model gains either 1 Weapon Modification or 1 Crusade Relic.

STRATEGIC EXCRUCIATION

There is a horrible art to the battlefield interrogation of captured foes. It must be done swiftly and with the greatest efficacy, prying loose the enemy's vital secrets using a mixture of shock tactics and frantic agony.

Each time an **AGENTS OF THE IMPERIUM** unit from your Crusade army destroys an enemy unit with a melee attack, that unit gains 1XP (to a maximum of 3XP per battle). If that enemy unit was a **CHARACTER** unit, you also gain 1 Intrigue point (or D3 Intrigue points instead if that enemy unit was your opponent's **WARLORD**).

EXECUTION ORDER

Sometimes the enemy's plans can be thwarted by the timely application of a single perfectly placed bolt shell or envenomed blade. Such executions of vital targets delay and disrupt an enemy's plans, buying time to further your own investigations.

At the end of the battle, if your opponent's **WARLORD** has been destroyed, select one **AGENTS OF THE IMPERIUM CHARACTER** unit from your Crusade army. That model gains 3XP and you gain 1 Investigation point.

CLANDESTINE INFILTRATION

Imperial agents will often work in the utmost secrecy to implant embedded operatives behind the enemy lines, such combat-capable assets only revealing themselves when the moment is right.

At the end of your turn, you can select one **AGENTS OF THE IMPERIUM** unit from your Crusade army that is wholly within your opponent's deployment zone. That unit gains 1XP. At the end of the battle, if one or more **AGENTS OF THE IMPERIUM** units from your Crusade army are wholly within 6" of your opponent's battlefield edge, you gain D3 Intrigue points.

LONG VIGIL

The Deathwatch stand sentinel over some of the most heavily alien-infested and dangerous expanses of Imperial space. They have guarded these sites for millennia against horrors uncounted, and they seize every opportunity to refine their battle strategies. With each victory over their enemies, so the Shield That Slays is fortified for its next battle against the xenos threat.

At the end of the battle, if there are no models from your opponent's Crusade army on the battlefield, each **DEATHWATCH** unit from your Crusade army that is on the battlefield gains 2XP and you gain D3 Influence points. At the end of the battle, if there are models from your opponent's Crusade army on the battlefield, but none of them are within your deployment zone, each **DEATHWATCH** unit from your Crusade army that is on the battlefield gains 1XP and you gain 1 Influence point.

REQUISITIONS

If your Crusade army includes any **AGENTS OF THE IMPERIUM** units, you can spend Requisition points (RP) on any of the following Requisitions.

INQUISITORIAL MANDATE 1RP

In helping an Inquisitor to achieve their own inscrutable agendas, a few honoured servants of the Golden Throne have earned the gratitude of the Holy Ordos. The reward for excelling in the eyes of such remorseless individuals is typically... another job.

Purchase this Requisition when you are selecting Agendas, if your Crusade force contains one or more **INQUISITOR** models. You can select one additional Agents of the Imperium Agenda to use in that battle. If one or more units from your army gain XP in that battle due to that Agenda, you gain 1 RP.

FORGE KILLTEAM 1RP

Those veteran Space Marines who earn the station of Watch Master become adept at recognising how best to fuse the disparate skills of their subordinate battle-brothers. They know well how to ensure that rival Chapter cultures blend without friction while complementary tactical approaches are exploited to their greatest potential.

Purchase this Requisition just after you have won a battle, if your Crusade force contains one or more **WATCH MASTER** models. You may select a second unit to be Marked for Greatness if it has the **DEATHWATCH** keyword (excluding **CHARACTERS**).

PRIVATEERING 1RP

Empowered by the Throne and backed by prodigious military forces from Imperial Guard regiments to Space Marine Chapters, Rogue Traders can seize whatever assets they want by force.

Purchase this Requisition once per Shadow Operation, if your Order of Battle contains one or more **VOIDFARERS CHARACTER** models. When purchased, you can do one of the following:

- Gain either D3 Influence or D3 Intrigue points.
- Lose 3 Influence and/or Intrigue points (in any combination) and gain D3+1RP.

CRAFTED FOR BATTLE 2RP

It is within the gift of some Imperial agents to requisition warriors augmented by master artificers, enhanced through rare gene therapies or provided with additional elite combat training.

Purchase this Requisition when you add a **RETINUE** unit to your Order of Battle, if your Crusade force contains one or more **AGENTS OF THE IMPERIUM CHARACTER** units that have the Battle-hardened rank or higher. That **RETINUE** unit gains 6 experience points and gains the Blooded rank. Select one Battle Honour for them.

INVESTIGATION CHAMBER 1RP

This facility provides your agents with powerful cogitators, encrypted vox-channels and an array of covert assets that can hugely enhance their abilities.

You can purchase this Requisition once per Shadow Operation, just before rolling on the Plot Twists table. Select the result instead of rolling randomly.

BATTLE TRAITS

When an **AGENTS OF THE IMPERIUM** unit gains a Battle Trait, you can use one of the tables presented here to determine which Battle Trait that unit has gained.

DEATHWATCH UNITS D6

BROTHERHOOD OF VETERANS ⚀ ⚁

Battle-brothers of the Deathwatch learn not only the many ways in which to slay the xenos, but also gain an understanding of the doctrines and tactics of fellow Chapters. They have learned well the benefits of adapting to best their foes.

At the end of the battle, you can remove one or more Battle Honours that this unit has (except for this one). For each Battle Honour removed, you can immediately select a new Battle Honour for this unit.

UNWAVERING ENMITY ⚄ ⚅

These veterans have raised the slaying of xenos to a high art, the creatures' every flaw and weakness known to them.

Each time a model in this unit makes an attack that targets a unit that does not have either the **IMPERIUM** or **CHAOS** keywords, that attack has the **[LETHAL HITS]** ability.

TENACIOUS HUNTERS ⚄ ⚅

From foetid xenos burrows to the pulsating innards of hive ships and the ramshackle confines of Ork scrap forts, these warriors are masters of driving deep into the territories of their prey and causing maximum damage.

This unit has the **Infiltrators** ability. At the end of a battle, if one or more units with this Battle Trait are wholly within 6" of your opponent's battlefield edge, you gain 1 Influence point.

INQUISITORIAL AGENTS UNITS D6

RUTHLESS INTERROGATORS

Zealous and ever-suspicious, these heartless warriors never miss a chance to wring secrets from their tormented foes.

Each time a model in this unit makes a melee attack, re-roll a **Hit roll** of 1. At the end of the battle, if one or more enemy **CHARACTER** models were destroyed by melee attacks during that battle, and one or more units with this Battle Trait were on the battlefield at the end of the battle, you gain 1 Investigation point.

ARTFUL OPERATIVES

This band of agents displays a cunning knack for moving undetected and appearing wherever their master needs them most.

During the Declare Battle Formations step, select either the **Infiltrators**, **Scouts** 6" or **Deep Strike** ability. Until the end of the battle, this unit has the selected ability.

DEVOTION TO THE THRONE

So single-minded and unrelenting are these agents that their every thought and deed is utterly dedicated to furthering their ability to serve the Master of Mankind.

Each time this unit is Marked for Greatness, it gains an additional 2XP. For each unit from your Crusade army with this Battle Trait that is on the battlefield at the end of the battle, roll one D6: for each 6, you gain either 1 Intrigue point or 1 Influence point.

ADEPTUS ARBITES UNITS D6

RESPONSE OFFICERS

These Arbitrators are swift and uncompromising in their response to heresy.

Models in this unit have the **Scouts** 6" ability.

JUDICIOUS EFFICIENCY

This squad executes their unrest suppression drills with an icy calm that seems almost inhuman.

This unit is eligible to shoot or declare a charge in a turn in which it Fell Back.

REPRESS AND DETAIN

It is second nature to these Arbitrators to stun, disarm or otherwise incapacitate combat opponents for later excruciation.

While an enemy unit (excluding **MONSTERS** or **VEHICLES**) is within **Engagement Range** of one or more units with this Battle Trait, each time a model in that enemy unit makes a melee attack, subtract 1 from the **Hit roll**.

VOIDFARERS UNITS

D6

BRIDGEHEAD SPECIALISTS

It often falls to naval landing parties to seize and ransack key strategic objectives during bridgehead operations.

Add 1 to the Objective Control characteristic of models in this unit. At the end of the battle, if one or more units with this Battle Trait are within range of an objective marker you control, roll one D6, adding 1 to the result if that objective marker is within your opponent's deployment zone. On a 4+, you gain 1RP (you cannot gain more than 1RP per battle as a result of this battle trait, no matter how many units have it).

DECK GUNNERS

Long experience ofsweepingfoesfrom shipboard corridors has taught these warriors to focus their fire to great effect.

Ranged weapons equipped by models in this unit have the **[SUSTAINED HITS 1]** ability.

REPULSE BOARDERS!

Driving enemy boarding parties back into the void shares many similarities with driving the enemy back from your battle lines.

Once per turn, you can target this unit with the **Fire Overwatch** or **Heroic Intervention** Stratagem for 0CP.

CHARACTER UNITS D6

ESOTERIC LORE

This agent's travels have seen them learn many powerful secrets and taught them to prepare for anything.

If this model is your **WARLORD**, you can use one Crusade Blessing even if you are not the Underdog.

QUARRY SEEKER

A hunter such as this neverenters battle without worthy prey in their sights.

At the start of the battle, select one unit from your opponent's Crusade army. Each time a model in this **CHARACTER**'s unit makes an attack that targets that unit, you can re-roll the **Hit roll**.

DUELLIST

Some agents invest considerable time and effort into perfecting their duelling skills.

Improve the Attacks, Damage and Weapon Skill characteristics of this model's melee weapons by 1. This model's melee weapons gain the **[PRECISION]** ability.

CLANDESTINE INVESTIGATOR

Keen of eye and sharp of mind, nothing escapes the notice of this cunning detective.

While this model is leading a unit, models in this unit have the **Stealth** ability. At the end of the battle, if this model's unit is wholly within your opponent's deployment zone, roll one D6: on a 4+, you gain 1 Investigation point.

INTOLERANT ZEAL

This agent's sheer faith armours them against the horrors of the galaxy.

This model has the **Feel No Pain 4+** ability and, if this model is an **INQUISITOR**, it has the **PURITAN** keyword. In addition, if this model is your **WARLORD**, atthe end of the battle, you gain 1 additional Influence point. If this model gains the **RADICAL** keyword for any reason it immediately loses this Battle Trait and the **PURITAN** keyword.

EXTREME METHODS

An agent such as this has no qualms about employing tools deemed heretical if it serves Humanity's interests.

This model's weapons have the **[DEVASTATING WOUNDS]** ability and, if this model is an **INQUISITOR**, it gains the **RADICAL** keyword. In addition, if this model is your **WARLORD**, at the end of the battle, you gain 1 additional Intrigue point. If this model gains the **PURITAN** keyword for any reason it immediately loses this Battle Trait and the **RADICAL** keyword.

CRUSADE RELICS

When an **AGENTS OF THE IMPERIUM CHARACTER** model gains a Crusade Relic, you can select one of the Crusade Relics presented here.

ARTIFICER RELICS

BLADE OF THE ORDO

Many Inquisitors have commissioned or acquired masterwork power blades. No two such weapons are exactly alike, but all are potent martial tools taken by them into battle.

Each time the bearer is selected to fight, select one of the following abilities to apply to the bearers melee weapons until the end of the phase:

- [LANCE]
- [LETHAL HITS]
- [PRECISION]
- [SUSTAINED HITS 1]

DIGITAL ARSENAL

These seemingly ornamental rings conceal powerful lasers, needlers and the like to give foes a deadly shock.

Each time the bearer is selected to shoot, after selecting targets for all of its ranged weapons, select one enemy unit targeted by one or more of the bearers attacks and roll three D6: for each 4+, that unit suffers 1 **mortal wound**. Mortal wounds inflicted by this Crusade Relic can be allocated as if they had the [PRECISION] ability.

TRUESILVER WEAVE

This lightweight undersuit is threaded with hexagrammic truesilver microwardings that help shield the wearer from harm.

Each time an attack is allocated to the bearer, change the Damage characteristic of that attack to 1.

ANTIQUITY RELICS

TAINTED BLADE

This weapon serves as the prison of a warp entity whose supernatural might enhances its lethality.

RADICAL model only. Improve the Attacks, Damage and Strength characteristics of the bearer's melee weapons by 1. Each time the bearer is selected to fight, it can unleash the full power of the blade. If it does, until that fight has been resolved, the bearer's melee weapons have the [HAZARDOUS] and [DEVASTATING WOUNDS] abilities as well.

ICON OF INTOLERANCE

Believed to be a holy icon that rewards dogmatic adherence to the Imperial Creed, in truth this ancient device contains multiple protective and energy-conversion force fields that preserve their bearer while giving every appearance of a miraculous resurrection.

PURITAN model only. The first time the bearer is destroyed, roll one D6 at the end of the phase. On a 2+, set the bearer back up on the battlefield, as close as possible to where it was destroyed and not within **Engagement Range** of any enemy units, with its full wounds remaining. All enemy units within 6" of the bearer must then take a **Battle-shock test**.

LEGENDARY RELICS

Archeotech Curiosity

High-ranking imperial agents maintain a veritable museum of unique treasures about their flagships and bases of operations, many dating from the dawn of the Imperium. A few of their rarest and most coveted treasures are not of Human origin at all.

At the start of the battle, roll three D6 (re-rolling any duplicates), then consult the table below to determine the three effects this Crusade Relic confers upon the bearer until the end of the battle.

ARCHEOTECH CURIOSITY	D6
DECEIT-FIELD *This powerful infomantic occluder blinds enemy weapon spirits and augurs to the bearer's presence.* The bearer's unit cannot be selected as the target of ranged attacks unless the firing model is within 18".	
WARP SHROUD *Perhaps derived from some ancient implementation of noctilith technology, this device repels empyric energy.* The bearer's unit has a 4+ invulnerable save against **Psychic Attacks**.	
STABILITY ACTUATOR *Gravity flows strangely around this device, aiding its bearer while entrapping their enemies.* The bearer's unit is eligible to shoot or declare a charge in a turn in which it Advanced or Fell Back.	
DIVINING AUGUR *Like an eye staring ahead into the mazes of the future, this strange implement advises against rash courses of action with flashing lights and rasps of harsh sound.* Once per battle round, you can re-roll one **Hit roll**, one **Wound roll** or one saving throw made for the bearer's unit.	
BIOMANTIC AMPLIFIER *This artefact plugs directly into the bearer's chest and pumps envitalising elixirs through their body.* Improve the bearer's Leadership, Objective Control, Save, Toughness and Wounds characteristics by 1.	
WEAPON FROM A LOST AGE *Who knows how many aeons this device has seen, how many different beings' hands, talons and pseudopods it has passed through, and yet still it is as deadly as ever.* Select one weapon equipped by the bearer (excluding weapons replaced by an Enhancement or Crusade Relic, and weapons that already have Weapon Modifications), then roll two D6 (re-rolling any duplicates) and consult the Weapon Modifications table in the main Crusade rules to randomly determine two effects it gains.	

MYRIAD MISSIONS AND PERILOUS PATHS

The Shadow Operations undertaken by Imperial agents are amongst the most esoteric and varied faced by any servants of the Golden Throne. Some are iconic encounters - an Ordo Malleus Inquisitor destroying a daemon-worshipping cult, or a Rogue Trader hunting for an ancient and priceless artefact. But others are more atypical, and may prove all the more interesting for it!

Why would a Navigator be charged with preventing an unholy ritual or an Imperial Priest find themselves rooting out a spy network? And, while only Inquisitors are ever labelled as Puritans or Radicals, what fanatically pious or borderline-heretical paths might some of these more unusual missions set other Imperial agents onto? Might a Rogue Trader cling to their redoubled faith in the God-Emperor after being confronted by the diabolical, or an Imperial Priests devotion transform into something more infernal if they read the wrong heretical tome?

If you want to tell such classic or unusual stories with your Imperial Agents Crusade force, and explore the dark paths your forces might have to follow, you can use the tables below as inspiration to help you do so. Simply choose the table that fits a character in your army whose story interests you and pick your favourite result, or roll a D6 to generate a story hook for them.

ORDO XENOS INQUISITOR D6

Mistaken Idolatry

The average Human malcontent does not know the difference between a daemonic entity and a cunning xenos impersonating one to further its own agenda. The cultists your Inquisitor must now exterminate are a prime example of this.

Siren Song

An Imperial cardinal's treasured relic has, in fact, been carved from psionically charged xenos biomatter and is even now calling out to a ravening alien swarm. There is no time for diplomacy from your Inquisitor- even if accusations of radicalism may follow from certain quarters, the threat must be eliminated by force.

Conflicting Operations

Saboteurs working for a rival Imperial agent have fouled your Inquisitor's schemes, and seem to presume their goal takes precedence. They do not realise the alien peril they will unleash if this continues.

ORDO MALLEUS INQUISITOR D6

Alien Eyes

A cunning xenos faction have worked a spy network into the infrastructure of an Imperial world. Yet in doingsothey have unwittingly undermined a secret order who safeguarded an infernal threat. Your Inquisitor must eradicate the aliens to prevent disaster!

Commander's Folly

Demands by an Imperial general in a neighbouring system are drawing tithed regiments away from a war which - unbeknownst to all but themselves - the daemon hunters need to see won at all costs. Polite requests for the general to desist have failed. Now it is time for your Inquisitor to use force.

An Ancient Threat

Though the artefact or ritual site that your Inquisitor seeks is of ancient xenos provenance, and defended by hosts of aliens, its destabilising nature is tearing at the veil between realspace and the warp. This must be stopped.

ORDO HERETICUS INQUISITOR D6

Puppets

The enemy here may appearto be loyal Imperial warriors, but in truth a heretical witch of incredible poweris manipulating them through psychic compulsion. Your Inquisitor must give them the Emperor's mercy.

The Grimoire

A tainted tome of such heretical power is likely to attract heretics, Chaos worshippers, rival Imperial organisations and perhaps even covetous xenos. Your Inquisitor must be the one to secure it, but will they puritanically destroy it, or will they stray into radicalism by ransacking its secrets?

Tithewardens

Twisted xenos scientists are stealing viable Human psykers for their own experiments, and so impactingthe tithe of local worlds. By purging the aliens your Inquisitor will end the problem at its source.

ROGUE TRADER D6

On the Fringes 

Your Rogue Trader's voyages have revealed cunning agents of some xenos power seeking to undermine Imperial rule. The foe have camouflaged themselves well, however. Slaying them may lead to accusations of heresy from those taken in by their lies.

Poisoned Chaiice 

The artefact your Rogue Trader seeks is worth more than mere physical wealth, for it has ancient empyric powers. To secure and destroy this thing would be the prescribed course of action, but straying into heretical dabbling - for the greater Imperial good, of course - is tempting.

Despised Rival 

Another Rogue Trader is decrying yours, disputing their claim to hard-won riches or even the authenticity of their family's charter. They must be silenced, even if it means localised civil war.

Trade Disruption 

Your Rogue Trader might have stayed out of the Chaos cult uprising on this system's capital world, except that it has fouled a major trade route. Whether out of pious sentiment orto protect theirown profits, they must end these heretic fools.

Co-opted Envoy 

When Sisters of Silence boarded your Rogue Trader's flagship, it seemed impolitic to refuse their commands. Thus, your Rogue Trader now finds themselves hunting down heretics who have dared disrupt the Imperial tithe.

Opened Eye 

Some truths should remain hidden, yet exposure to an especially heretical or infernal foe has forced your Rogue Trader to learn things they never wished to. Will this knowledge drive them to redouble their faith and intolerance, or will it lead them down the path of reckless curiosity?

WATCH MASTER D6

No Hero

A mighty Imperial warlord is lauded for their successes, yet your Watch Master has learned their might stems from a prohibited xenos source. They must be eliminated, even if doing so costs the Imperium - and your Watch Master- dearly.

Linchpin World

Those who seek to plunge this world into the warp might be worshippers of the Dark Gods, yet if they succeed they will inadvertently open the way for a vast xenos invasion of an entire sub-sector. Your Watch Master must stop them.

Foul Fragment

A precious STC template has been discovered by Imperial explorators, yet it has languished upon an alien world for millennia and your Watch Master is certain of its corruption. To destroy this thing will surely prove the unwavering nature of your Watch Master's devotion, even as it draws furious accusations of heresy from the Tech-Priests.

Blind Devotion

A network of covert operatives are close to uncovering an ancient secret from the DarkAge of Technology. Yet your Watch Master has learned that they serve alien powers, whether knowingly or not. These curious eyes must be blinded, and swiftly.

Imprecations

An outspoken lay preacher heaps scorn upon the anti-alien doctrines of the Imperium, and is rapidly gaining a wrathful following. Your Watch Masterwill silence this rabble rouser, and whatever xenos masters they truly serve.

Piracy

Xenos pirates prey upon shipping throughout this system and are now endangering the Imperial tithe for the entire region. Your Watch Master seeks to eradicate the alien threat. That he saves the necks of local planetary governors in the process is of little interest to him.

CRUSADE BADGES

When your Crusade force accomplishes specific long-term goals, you can earn the Crusade badges shown below, representing your warriors' successes over many battles.

ELITE OPERATIVE

Through your dedication, cunning and strength at arms, you have proven yourself a truly worthy asset. Whichever shadowy patrons you serve, they no longer consider you expendable and are instead watching your endeavours with interest. There are few who can long endure the shadow wars fought in the Emperors name, but you may yet prove to be such a one.

- You have completed one Shadow Operation (with a final Sub-sector Control of 1 or better).
- One or more models in your Crusade force have Vermilion-level Assets.
- You have won two or more battles.

CHAMPION OF THE IMPERIUM

You have halted profane rituals, exposed debased cults and brought stability to entire Imperial systems. Your battles may have cost many lives, but they have preserved vital Imperial infrastructure and institutions. Your star might be veiled amidst the shadows, but it is rising nonetheless.

- You have completed two or more Shadow Operations (with at least one Shadow Operation having a final Sub-sector Control of 6 or better).
- Two or more models in your Crusade force have Vermilion-level Assets.
- You have won six or more battles.

HAND OF THE HIGH LORDS

Where once you fought to fulfil the agendas of other - more powerful - patrons, now you are the one pulling the strings. You have crushed mighty enemies of the Imperium. You have set worlds ablaze in the name of the Master of Mankind, and feel no regret. Your name is whispered in terror by heretics and aliens alike, and spoken with respect in Terras halls of power.

- You have completed three or more Shadow Operations (with at least one Shadow Operation having a final Sub-sector Control of 9).
- Three or more models in your Crusade force have Vermilion-level Assets.
- One model from your Crusade force has acquired the Archeotech Curiosity Crusade Relic.
- You have won ten or more battles.

ABILITIES

Dedication to Duty: Each time a model in this unit is destroyed by a melee attack, if that model has not fought this phase, roll one D6: on a 4+, do not remove it from play. The destroyed model can fight after the attacking model's unit has finished making its attacks, and is then removed from play.

Nuncio Aquila: Once per battle, at the start of any Command phase, you can select one objective marker within 6" of the bearer. All enemy units (excluding MONSTERS and VEHICLES) within range of that objective marker must take a **Battle-shock test**. Each objective marker can only be targeted by this ability once per turn.

Designer's Note: *Place one Nuncio-aquila token next to the bearer, removing it once it uses this ability.*
